Honeywell Security & Custom Electronics

## **Honeywell Security & Custom Electronics Donates Equipment to Extreme Makeover: Home Edition**

Honeywell Security & Custom Electronics has donated an integrated automation and control system to a family in St. Petersburg, Florida, for the hit television reality program Extreme Makeover: Home Edition (ABC-TV). The two-hour episode will air this Sunday, May 1, at 7:00 p.m. EDT. On May 2, ABC will feature Honeywell on its Extreme Makeover: How'd They Do That? show at 8:00 p.m. EDT, where the installation from the previous evening will be described in detail.

Honeywell donated the Home Automation Server, an embedded computing platform that features state-of-the-art voice control technology to meet the unique needs of Mr. Jamie Dolan, a Florida resident who went blind after being shot during a workplace robbery. Voice control technology allows Mr. Dolan to give a simple vocal command (i.e. "stereo system on", "pre-heat the oven," "turn the lights on every evening at 6:00 pm," etc.) to aid in everyday tasks and control various home functions, making his life easier and his home more comfortable. The Dolan family can also interact with their home technology via a computer, phone or PDA.

The donated equipment includes:

- Honeywell Home Automation Server, featuring voice control application
- Honeywell structured wiring package (36' can, locking security panel, phone distribution module, CCTV distribution & cabling)
- VISTA-15 Pack Security System control and peripherals
- 6150 Security System Keypad
